SUMMARY

Passionate and motivated tech enthusiast, with a few years of experience in building projects and tutoring with Javascript-related stuff.

Looking for an opportunity to work in a challenging position that encourages me to combine my technical and nontechnical skills towards building profitable solutions by being an active team player. My main goal is to be keen on learning and being up to date with the cutting-edge releases.

EXPERIENCE

Internship At TapTap.inc (May 2020 - October 2020)

Description: I was a full-stack developer with the role of an internee, During this role, I worked on TapTap's chrome extension basically the extension is related to audio capturing my role in extension is authenticating users, saving snippets to the database, and the major work I did during this period is developed the whole web application which is related to that extension and have features like complete audio player, transcribing the audio into different languages, generating encrypted share-able links so the user can share their snippets with others and that links are also open in a separate TapTap's web app with the encrypted links to prevent unauthorized access to other folders and snippets of that user.

PROJECTS

Thy Yard (MERN Stack, React-Native)

This project is an Omani Company with several businesses like Restaurants, Customized Containers selling, Event's place booking and To-let screens booking and want's their all businesses to be online. I with my friend makes all their business online by making web and mobile application for their businesses.

SkyBeat (React Native)

It's a music app, I developed this app because I mostly face a problem on my i-phone related to downloading youtube videos so I decided to make an app that uses youtube API with the extra feature that user can not just only play/watch youtube videos on SkyBeat but also download youtube videos not only in SkyBeat app but also directly download to Photos/Gallery so they can watch while they are offline.

Instagram Clone (React, Node, Express, MySQL)

A web app inspired by Instagram, basically I recreate Instagram functionality to practice relational database design and development concepts. Authentication/Authorization, creating posts, like/comment, use hashtags, search any user, follow/unfollow.

Chat Application (Node.js, Express.js, HBS)

Anyone can create or join any particular room & chat with each other, share location, and many more using NodeJs.

EDUCATION

Bachelors in Computer Science

2018 - 2022

International Islamic University Islamabad

The current **CGPA** is **3.67/4.00**

SKILLS

- C++
- Data Structures and Algorithms.
- HTML
- CSS
- JAVASCRIPT
- TYPESCRIPT
- REACT.JS
- REACT NATIVE (cross-platform development)
- REDUX
- NODE.JS
- EXPRESS.JS
- REST API'S
- SOCKET.IO
- Database Design & Development.
- MYSQL.
- MONGO DB.
- FIREBASE.
- GIT & GITHUB.

STRENGTHS

- Oral & Written Communication.
- Team Building.
- Consistent.
- Time & Task Management.
- Committed To Continuous Learning.

INTERESTS

- Coding.
- Music.
- Cricket.
